December 10, 2024

The 11th EAI International Conference on Cloud Computing, Big Data, and IoT (CloudComp 2024) will be held virtually on December 10, 2024. The conference will bring together researchers, practitioners, and industry experts to share their latest findings and experiences in the field of cloud computing, big data, and IoT.

Cloud computing is a rapidly growing field that is transforming the way we use and access information. Cloud computing services allow businesses and individuals to store and process data, run applications, and access computing resources on demand, without having to invest in and maintain their own infrastructure. Big data is another rapidly growing field that is changing the way we do business. Big data refers to the vast amount of data that is generated by businesses and individuals every day. This data can be used to gain insights into customer behavior, improve operational efficiency, and develop new products and services.

IoT is the third major theme of CloudComp 2024. IoT refers to the network of physical devices that are connected to the internet and to each other. These devices can collect and share data, which can be used to improve efficiency, safety, and convenience in a variety of settings.

CloudComp 2024 will feature a variety of keynote speakers, technical sessions, and workshops. The conference will also provide opportunities for networking and collaboration among attendees. If you are interested in learning more about the latest developments in cloud computing, big data, and IoT, then CloudComp 2024 is the perfect event for you.

Important Dates

- Paper submission deadline: September 15, 2024
- Notification of acceptance: October 15, 2024
- Camera-ready paper submission deadline: November 15, 2024
- Conference date: December 10, 2024

Submission Guidelines

CloudComp 2024 welcomes submissions of original research papers, case studies, and experience reports on all aspects of cloud computing, big data, and IoT. Papers should be submitted electronically through the conference website.

All submissions will be peer-reviewed by a panel of experts in the field. Accepted papers will be published in the conference proceedings.

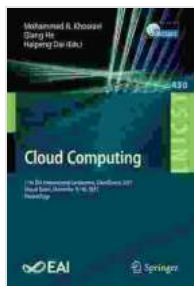

Topics of Interest

CloudComp 2024 will cover a wide range of topics, including but not limited to:

- Cloud computing architectures and platforms
- Cloud computing security and privacy
- Cloud computing performance and scalability
- Cloud computing applications
- Big data analytics
- Big data storage and management
- Big data visualization
- Big data applications
- IoT architectures and platforms
- IoT security and privacy
- IoT applications

Contact Information

For more information about CloudComp 2024, please contact the conference organizers at cloudcomp@eai.eu.
