In this guide, we will cover everything you need to know about red-eared sliders, including their appearance, behavior, feeding habits, and housing requirements.

### Appearance

Red-eared sliders are medium-sized turtles, with a shell length of up to 12 inches. They have a dark green or brown carapace (top shell) with yellow or orange stripes. Their plastron (bottom shell) is yellow or cream-colored

with dark markings. Red-eared sliders have a long neck with a reddish-orange stripe on each side of their head. They also have webbed feet and a long tail.

## **Behavior**

Red-eared sliders are active turtles that enjoy swimming, basking, and exploring their environment. They are also social animals that enjoy interacting with other turtles. Red-eared sliders are typically docile, but they can become aggressive if they feel threatened.

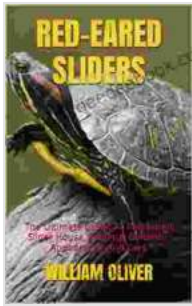

## **Feeding**

Red-eared sliders are omnivorous, which means that they eat both plants and animals. In the wild, they eat a variety of foods, including insects, worms, snails, fish, and plants. In captivity, red-eared sliders can be fed a diet of commercial turtle food, live insects, and fresh vegetables.

## **Housing**

Red-eared sliders need a large enclosure that provides them with plenty of space to swim, bask, and explore. The enclosure should also have a secure lid to prevent the turtles from escaping. In addition, the enclosure should have a water area that is deep enough for the turtles to swim in. The water should be kept clean and at a temperature of 75-80 degrees Fahrenheit.

Red-eared sliders can make great pets for those who are willing to provide them with the proper care. By following the tips in this guide, you can help your red-eared slider live a long and healthy life.
