

Tsra Review Of Cardiothoracic Surgery: A Comprehensive Guide

The Tsra Review Of Cardiothoracic Surgery is a comprehensive review course designed to help surgeons prepare for the American Board of Thoracic and Cardiovascular Surgery (ABTS) certification exam. The course is offered by the Thoracic Surgery Residents Association (Tsra) and is updated annually to reflect the latest advances in cardiothoracic surgery.

The primary purpose of the Tsra Review Of Cardiothoracic Surgery is to help surgeons pass the ABTS certification exam. The course covers all of the topics that are tested on the exam, including:

- Anatomy and Physiology of the Thoracic and Cardiovascular Systems
- Preoperative Evaluation and Management
- Surgical Techniques
- Postoperative Care
- Complications of Cardiothoracic Surgery

In addition to helping surgeons pass the ABTS exam, the Tsra Review Of Cardiothoracic Surgery can also be beneficial for surgeons who want to stay up-to-date on the latest advances in the field. The course provides a comprehensive overview of cardiothoracic surgery and can help surgeons identify areas where they need additional training.
